

Rec-It Volleyball Analysis

Management Skills Team 1

Zayd Ahammed, Ajit Sivakumar, John Gossard,
Vama Samir Patel, Steven Phang

01

Introduction

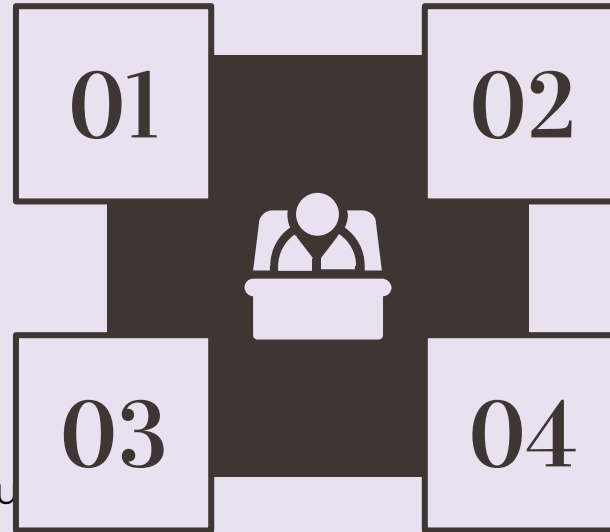

Company Access

Organization

Rec-It Volleyball

Interviews

Cliff Barney (CEO),
Kelly Braktro (Coach), Riju
Jain (Coach)

Location

Metuchen
South Plainfield
Cranford

Purpose

Analyze processes
using course
concepts and
propose solution

Background Information and Secondary Data Collection

Organization Strategy

Teaching new players the skills needed to succeed at club level through a 2 year 4 stage program and a feeder program to established clubs

Secondary Data

Youth participation is rising, with boys volleyball is the fastest growing sport in NJ (+76%) and NJ is expanding middle school volleyball programs,

Competition

No real competition in the NJ area due to focus on new players

Roles and Structure

27 members with mostly part time managers aged 16-28. Ceo in 40s.

Demographics

Gender Split is nearly 50/50 with large racial diversity

Data Collection Methods and Timeline

Internal Communication

within a group chat with
CEO and key employees

Interviews

with both the CEO
and employees

Personal Testimony

From former employee in
our group

04

September 2024

-

Ajit worked as a
coach at Rec-it

October 12/13, 2025

-

Surveyed Cliff(the
owner), Kelly Bratko
and Rijul Jain for the
first time

October 20, 2025

-

In depth Survey
with Cliff, findings
about future
ventures and plans.

November 12, 2025

-

Interview with Cliff
and Rijul Jain,
served as refresher
before making
recommendations.

Management Issues and Perspectives

Output Problems

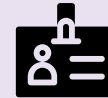

1. Management Delegation Issues due to Rapid Expansion
2. Weak Extrinsic Motivation System for Coaches

Manager

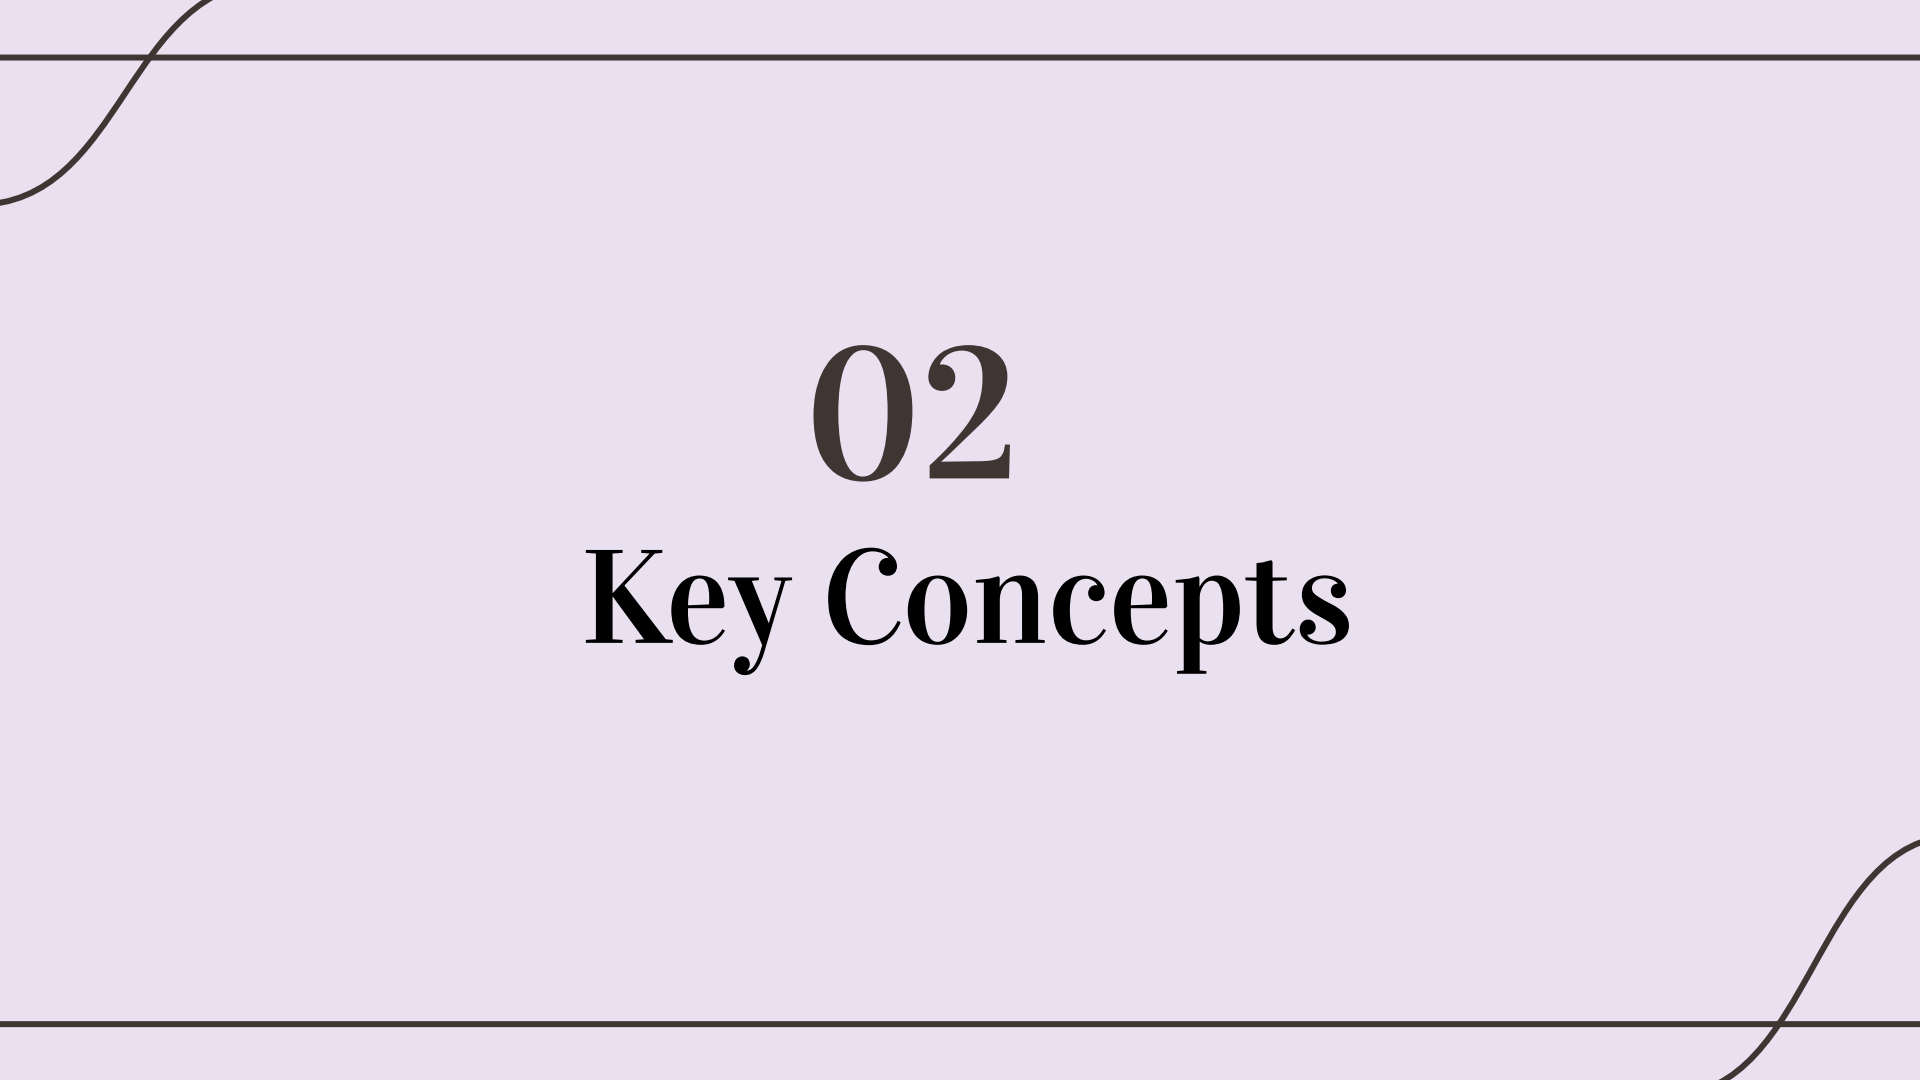

Cliff feels like the rapid expansion has diluted his ability to keep track of all his employees

Perspectives

Employee

Coaches are put into unclear or unsuitable roles and feel unmotivated to do their work

02

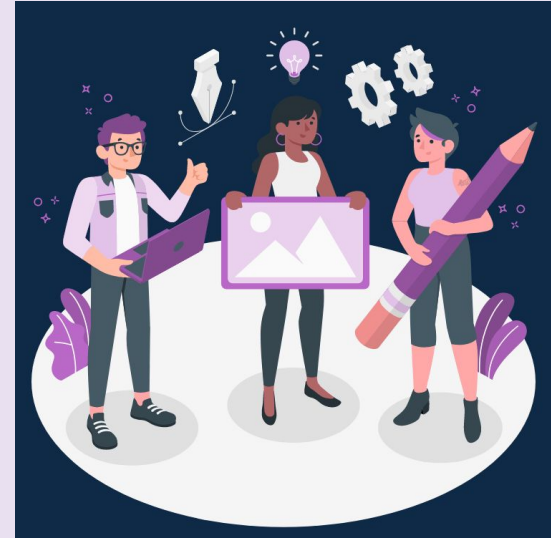

Key Concepts

Concept 1: Knowing Your People

Definition: In order to run a team effectively, knowing your team members strengths and weaknesses is essential. This includes knowing...

- Abilities of members
- Personality and values of members
- Diversity of members
- Motivation of members

Without “knowing your people”, tasks will not be allocated in the best manner, leading to a collapse of team effectiveness

Evidence for Concept 1

Rapid Team Growth

The surge in the amount of employees has led to Cliff being unable to understand all of them.

Unclear Roles in the Company

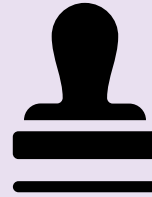

Employees are put into roles that are unclear or don't suit their skill sets well.

Evidence for Concept 1 cont.

Managerial Breakdown

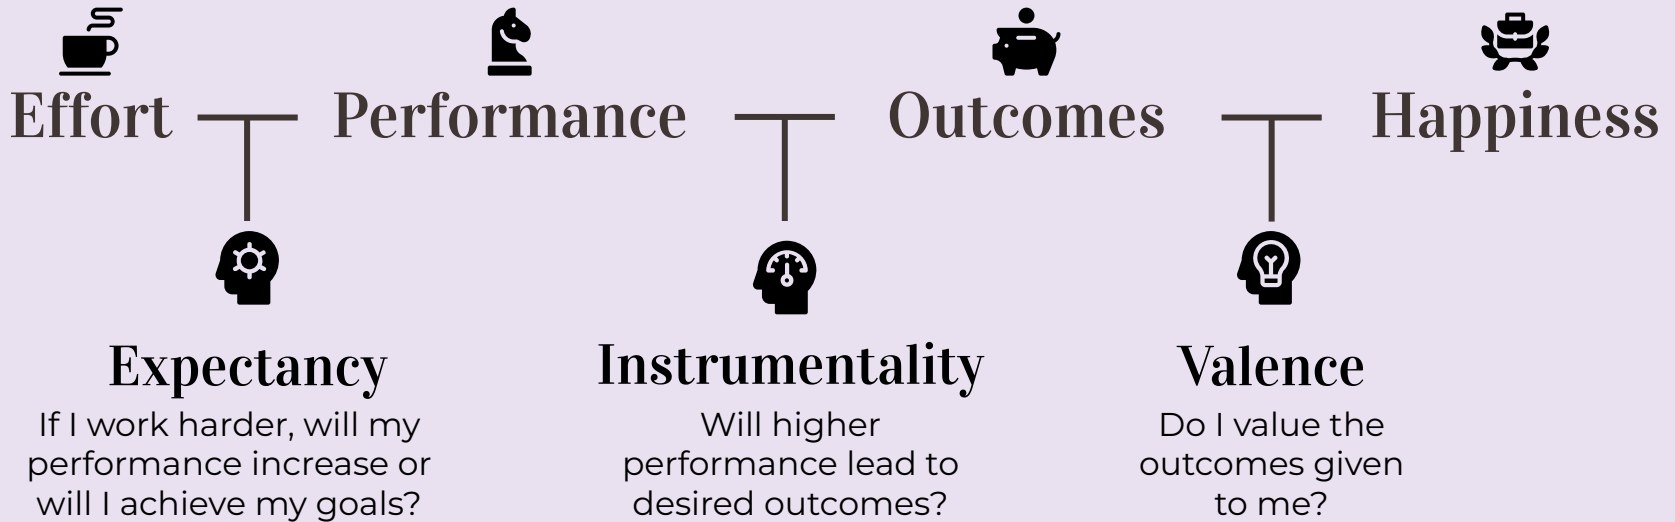

Cliff is unable to perform the basic tasks of management

Over Reliance on Kelly

Kelly is relied upon too much due to her knowledge of employees

Concept 2: Expectancy Theory/Extrinsic Motivation

Evidence for Concept 2

Expansion and Motivation

With the rapid expansion
of the company,
motivation has become
much harder to track

\$30.00 Incentive Issues

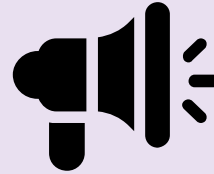

There is a \$30.00 incentive
for good performance but
the evaluation is only
based on reviews

Evidence for Concept 2 cont.

Distributive Injustice

The \$30.00 incentive basis on reviews can lead to undeserving employees getting the benefit.

External Factors vs. Performance

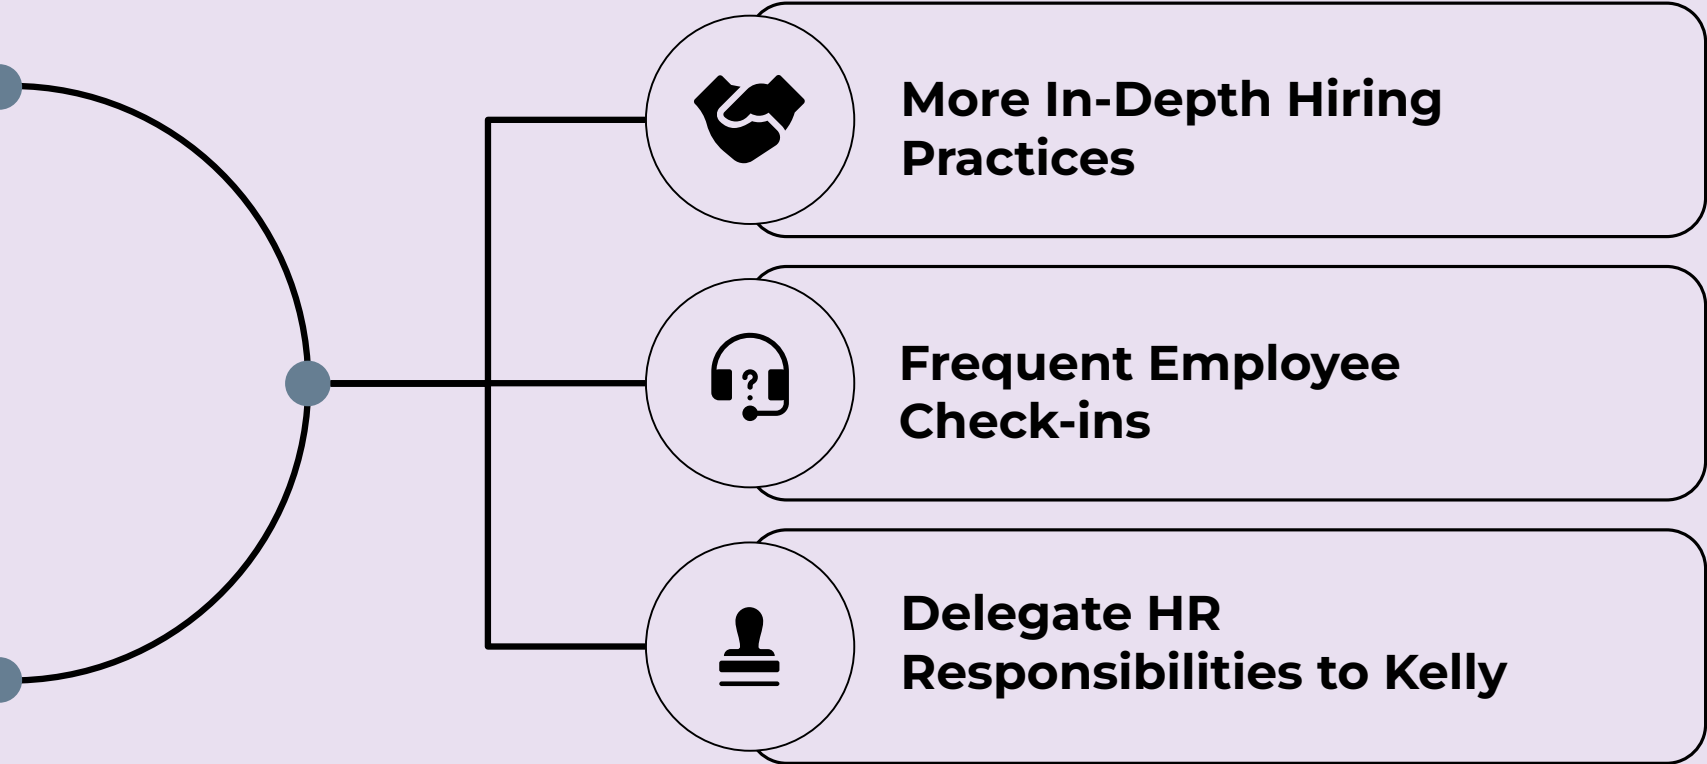

The \$30.00 incentive heavily relies on pleasing parents vs. actual performance improvement

03

Solutions & Implementation

Solution 1: Improve HR Practices

Best Practices

1.

Ensure personality tests are used as a supplement

2.

Use structured interviews for consistency

3.

Ensure check-ins happen on a regular basis

4.

Ensure that employees feel practices are fair

5.

Keep documentation of hirings to analyze later

Downsides

1.

Cliff still may not develop relationship with coaches

2.

Over Reliance on Kelly still persists as an issue.

3.

Kelly may not want HR position or need training

Financial Cost

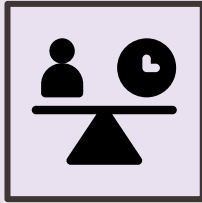

HR Cost

If Kelly decides to accept a managerial position, she will want to get compensated. Average hourly pay is \$21.

Personality

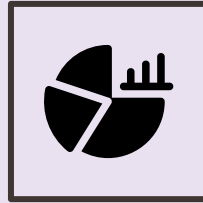

Each Personality test in MBTI teams costs \$99.99. Which is an additional variable cost the business will have to account for.

Solution 2: Create Standardized Customer Surveys

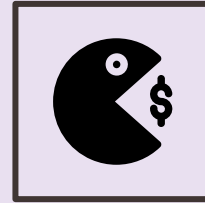

1.

Questions which
target behavior,
not outcomes

2.

Reduces Bias from
age, parental
influence, etc.

3.

Allows rewarding
based on more
objective measures

Best Practices

1.

Tie bonuses to behavior-based metrics, not outcomes

2.

Ensure surveys are anonymous to encourage honesty

3.

Emphasize gradual improvement rather than single results

4.

Combine subjective customer feedback with objective metrics

5.

Distribute the surveys randomly so coaches are not aware of who is giving the reviews

6.

Keep implementation costs low by distributing surveys electronically

Downsides

1.

Parents may hesitate to be honest, due to not wanting to hurt coach

2.

Surveys may attract only very happy or very unhappy respondents

3.

Risk of coaches optimizing for customer approval instead of instructional rigor

4.

Coaches might pressure families into giving high ratings

Communication Strategies and Influence Tactics

FITD Technique

Start with small request
before moving to larger
one

Authority

Demonstrate expertise
and use data backed
sources

Social Proof

Provide examples of
other companies using
the techniques

Personal Connection

Leverage prior
relationships to
encourage changes

THANK
YOU
